

About KabaFusion

KabaFusion is a pharmacist-owned, patient-focused team of professionals with extensive experience in home infusion and specialty infusion therapy. Our pharmacists, nurses and reimbursement specialists work as a team to provide your patient with compassionate, efficient and reliable care.

As a result, patients experience seamless coordination of care, reduced adverse events, reduced costs and optimization of their medical treatment. KabaFusion and its affiliate companies are contracted with most major health plans and medical groups.

Putting the **CARE** Back Into Healthcare

At KabaFusion, we are focused on one basic principle; we make patient care our highest priority...

Patient CARE

Patient care is our primary focus. We improve the lives of patients by integrating comprehensive disease state management regimens with personalized compassionate care.

Physician CARE

Our dedicated team is uniquely qualified to work with physicians and successfully navigate the clinical and administrative complexities that are often associated with home infusion and specialty infusion therapy.

Payor CARE

Working together, we minimize the significant challenges faced by payors by acting as a partner. We share their goal of providing high quality care, while controlling the costs associated with expensive infusion therapies.

Comprehensive Services

Pharmacy

- ACHC Accredited
- Compliant with USP 797 clean room regulations
- 24/7 availability
- Each dose is custom compounded
- Individualized patient care plans

Nursing

- Specialized care for all infusion therapy needs
- Flexible RN visit scheduling
- RN stays throughout entire infusion

Intake

- Work with payors to achieve timely and effective authorizations
- Comprehensive patient financial support

Physicians

- Research collaborations
- Physician-based ambulatory infusion center expertise

Specialists in IVIG/SQIG

Immune globulin (IVIG/SQIG) is a plasma treatment that contains antibodies collected from the plasma of healthy donors and purified through a special process. It is used to treat patients that have a less than normal functioning immune system or, conversely, an overly active immune system.

KabaFusion is owned and operated by clinicians that have years of experience in disease management and treatment with immune globulin. With specialized nurses and highly trained reimbursement staff, the service and treatment for our patients is individually tailored for optimal outcomes.

Diseases Commonly Treated with IVIG/SQIG

Autoimmune Neuromuscular Diseases

- Chronic Immune Demyelinating Polyneuropathy (CIDP)
- Multifocal Motor Neuropathy (MMN)
- Multiple Sclerosis (MS)
- Myasthenia Gravis (MG)
- Polymyositis
- Guillain Barre Syndrom (GBS)
- Dermatomyositis

Primary Immune Deficiencies

- Congenital Agammaglobulinemia
- Common Variable Immunodeficiency (CVID)
- X-Linked Agammaglobulinemia
- Wiskott-Aldrich Syndrome
- Severe Combined Immunodeficiencies

Autoimmune Blistering Diseases

- Pemphigus
- Pemphigoid

Idiopathic Thrombocytopenic Purpura Infertility

Pre and Post Transplant Rejection
